**(22)Date of filing : 13.02.1998**

**(72)Inventor : TAKEUCHI YOSHIIHISA**

**(54) COMMUNICATIONS TERMINAL**

**(57)Abstract:**

**PROBLEM TO BE SOLVED:** To provide a communications terminal that rewrites a control program at a low cost with easy operation.

**SOLUTION:** In the communications terminal, a control program is stored in a flush memory 13 and a socket 16 is provided, in/from which an EPROM 21 storing a write program to rewrite the control program stored in the flush memory 13 and storing a control program written in the flush memory by the write program is loaded/unloaded.

## LEGAL STATUS

[Date of request for examination] 16.06.1999

[Date of sending the examiner's decision of rejection] 23.01.2001

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

**[Date of final disposal for application]**

**[Patent number]**

**[Date of registration]**

**[Number of appeal against examiner's decision of rejection]**

**[Date of requesting appeal against examiner's decision of rejection]**

[Date of extinction of right]
